Get more with Wiise

How our customers get more out-of-the-box, when they make the Wiise choice.

wiise

So, what's different about Wiise?

We've taken the base Business Central platform and built on top of it to give Aussie SMBs more, for less.

Working alongside our customers, we've been able to streamline more processes, add extra features and offer a number of capabilities in Wiise that Business Central just doesn't have.

Plus, we're a managed service. So you're not paying extra to maintain upgrades, integrations and more.

Save money on customisation

No need to pay extra to customise Wiise to Australian standards. Wiise is built for the Aussie market. You get an Australian ready Chart of Accounts, bank feeds, EFT and payroll integration right out of the box. You'd usually pay extra with Business Central.

We'll manage it all for you - no extra cost

The Business Central platform needs to be maintained. And your IT partner will charge for their time updating integrations, fixing issues and more. We don't charge extra for our managed service.

Backed by big business - here for the long-run

We're continually investing in Wiise and adding new features and integrations. We work with KPMG Australia, Microsoft and the Commonwealth Bank to bring you the system you need for now and the future.

A snapshot of Wiise

Wiise is custom-made for the Australian market. So, we have all the features you need to get up and running sooner. Without having to pay extra for customisation.

120,000+ extra lines of code

On top of the Microsoft Dynamics Business Central platform

Over 16 new features to Wiise

Including bank feeds, landed cost, EFT, BPAY, Direct Debit, multi-company payroll and more

100+ additional UI enhancements

We've added 100+ ways to make your user experience better in Wiise.
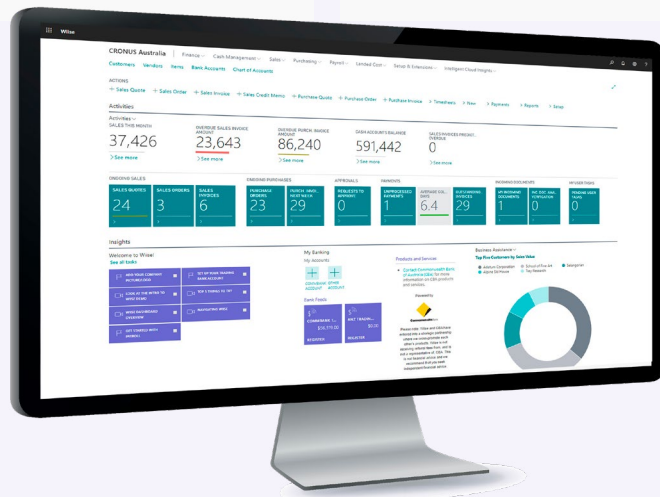

10 custom-made Wiise reports

Improved balance sheets, income statements and budget reports with extra fields to help you easily drill down into the detail

Pre-built integrations

Shopify, Square POS, Wiise Payroll, timesheet integration and more

7 custom-made Chart of Accounts

Industry specific CoA, designed by KPMG Australia, so it's right for the Aussie market

A bit about our managed service

We want to make it easier for businesses to get more without having to pay for a tonne of customisation. So, we've done a chunk of the hard work for you, and we'll continue to do so – to ensure Wiise always brings extra value.

When you move to Business Central, your partner will need to maintain the platform for you. And any of the customisation or extra integrations you have. You'll also have to pay for this maintenance.

At Wiise, we don't charge you a thing. Our team tests the Business Central platform upgrades to make sure everything works before we do the release. And we maintain all of the integrations that we've done in Wiise ourselves. So you don't have to worry or pay extra. We're a managed service.

Ongoing testing

Our product team does extensive regression, smoke and end-to-end testing on Wiise and all our developments to make sure they work for the Aussie market. No extra cost. It's all part of the package.

Stable platform

Wiise is more flexible than Business Central so you get a stable system for longer. BC partners have to upgrade their customers within a month of a release and wait for hot-fixes or patches for bugs. Wiise runs smoothly for months, giving our customers the best possible experience.

Direct connection

While other Business Central partners work through the Microsoft Support procedure, Wiise has a strong partnership with Microsoft. We meet weekly with their BC development and maintenance team. So we can provide better partner & customer feedback, faster issue fixes and great ideas to help you run your business better.

Our future road map

We're continually investing in Wiise. Whether it's UI enhancements, adding additional fields to help you get the most out of your data or integrations, you'll get way more with Wiise in the long-run. Without having to pay a tonne of money for ongoing customisation.
